FOCUS ON VACCINES

1. Write a paragraph describing the steps used to develop a vaccine.
2. Do you think governments should require people to get certain vaccines? Why or why not?
3. Which disease did the first vaccine help prevent?
A. smallpoxB. tetanusC. COVID-19

- **4.** Why would immunity from a live vaccine last longer than immunity from an inactivated vaccine?
 - **A.** Inactivated vaccines don't include any parts of the actual virus.
 - **B.** Live vaccines use a weakened virus, which can't trigger an immune response.
 - **C.** Live vaccines use a weakened virus, which triggers a stronger immune response.
