FOCUS ON TYRANNOSAURUS REX

1. Write a paragraph explaining how scientists determined if *T. rex* was a predator or a scavenger.

2. Do you think fossils should belong to the person who owns the land where they are found? Why or why not?

- 3. In what year was Sue discovered?
 - **A.** 1902
 - **B.** 1990
 - **C.** 2014
- 4. Why might T. rex have sometimes scavenged for food?
 - **A.** Its arms were too short for it to be a predator.
 - **B.** Its teeth were the wrong shape to bite prey.
 - **C.** Eating animal remains would have been easier than hunting.
