

FOCUS ON VACCINES

1. Write a paragraph explaining how vaccines create immunity.

2. If you were a parent, would you vaccinate your child? Why or why not?

3. Which vaccine requires a booster shot every 10 years?
 - A. mumps
 - B. polio
 - C. tetanus

4. Why are vaccines tested on a larger group during the third phase?
 - A. Using larger groups can reveal side effects that are too rare to happen in the smaller trials.
 - B. Using larger groups can increase the likelihood that the vaccine will produce immunity.
 - C. Using larger groups can help spread the news about the new vaccine.
